Additional string methods

- `contains()`
- `startsWith()` and `endsWith()`
- `replace()`
- `toLowerCase()` and `toUpperCase()`
- `equals()` and `equalsIgnoreCase()`
- `split()`
- `String.join()`

`String fullName = "Ben Langhinrichs";`

Immutable - Cannot be changed;

Mutable - Can be changed;

Arrays are fixed length, and thus immutable (in terms of size)

Strings wrap arrays of characters, and are thus immutable;
