Subclass and superclass / Child class and parent class / Base class and Derived class

IS-A
An alarm clock IS-A clock

HAS-A

Grandparent, parent, child classes example (courtesy of Dan):

public class Organism {...}
public class Animal {…}
public class Cat {…}

public class Animal extends Organism {….}
public class Cat extends Animal {…}

Cat IS A Animal. Animal IS A Organism. Therefore, Cat IS A Organism
Parent of a parent example
